(54) BAG

(57)Abstract:

PURPOSE: To permit an easy adjustment of a change in the outer and inner pressure of a bag by a method wherein the opening of the bag formed of sheet material is closed and the bag is provided at a part thereof with a valve for cutting off communication between the exterior and interior thereof.

CONSTITUTION: A bag is formed of sheet material and provided with a valve 2 at a part thereof and a fastener, adhesive agent or clip at an opening thereof for closing the same, the adjustment of the inner and outer pressure thereof being effected through the valve. As a result, there is obtained a bag whose inner and outer pressure can be adjusted easily to the intended change.
